

ScopeTote™

Infection Control Transfer Bags

- Safely and securely seals soiled medical supplies
- Unlike a tray, ScopeTote completely contains the post-procedural equipment, reducing the risk of spreading infection
- Clear in order to view contents
- Each bag incorporates a label

The clear 24" x 20" reclosable bag easily holds all types of endoscopes as well as other types of soiled medical equipment – neatly, clearly and compactly. It's the smart, safe choice.

Stops Contamination. Goes where your patients are.

Some patients require procedures in remote locations. ScopeTote by GI Supply is ideally suited for travel carts on the patient floor, so you can count on it to be where you are, wherever your patient needs you.

Clearly Contained. Secures Contamination.

Carrying scopes and other endoscopy equipment open and exposed after a procedure can increase the spread of infection. ScopeTote from GI Supply completely contains the equipment for safer, easier transport.
