

COMVI™ Pyloric/Duodenal Stent

"The covered, triple-layer metal stent was effective and safe for managing malignant GOO and can prevent tumor ingrowth and stent migration."

◀ After the endoscope was withdrawn, the COMVI™ stent showed good conformability along the duodenum
[Gastrointest Endosc. 2012 Apr;75(4): 757-63]

Niti-S™ COMVI™ Pyloric/Duodenal Stent

for malignant gastric outlet obstruction

Features

- **Triple layered construction:** Biocompatible PTFE membrane tube is held between inner and outer mesh
 - Unfixed cell structure enables stent to conform to tortuous anatomy
 - PTFE membrane prevents the risk of tissue invasion
 - Outer wire mesh prevents the risk of migration

- **Minimum foreshortening** for accurate stent placement
- **Radiopaque marker:** 4 (four) at both covered part ends

Ordering Information

TTS (Through The Scope)				
Code	Stent		Delivery	
	Diameter (mm)	Length (cm)	Profile (fr)	Usable Length (cm)
